

Our educational displays, located in the heart of our library, are designed to draw patrons, young and old, into exploring the chosen theme. We take care to create displays inviting at eye level for youngsters no more than three feet all, as well as visually enticing to a towering adult. Books relating to the featured theme are placed on the shelves below the glass cases within easy reach of inquiring minds. To date we have put forth displays on humor, travel, cooking, textile arts, book arts, art, letterpresses, animation, and sustainability. Soon we will be preparing for made-by-hand, developments in technology, and citizenship.
